

Advanced
Building
System

EMMEDUE System
Earthquake resistant, acoustic and
heat insulating construction system

ANALYSYS AND BEHAVIOUR OF STRUCTURES WITH EMMEDUE PANELS

EXPERIMENTAL TESTS CARRIED
OUT AT PADUA UNIVERSITY (ITALY)

Rev. 01 of 16/02/2003

Certificato n° 50 100 0605

EMMEDUE S.r.l. Via Toniolo, 39/b - 61030 Bellocchi di Fano (PU) ITALY

Index

1. BUILDINGS WITH LOAD-BEARING WALLS MADE BY EMMEDUE	
PSME PANEL	1
1.1 INTRODUCTION	1
1.2 BEHAVIOUR OF THE WALL SUBJECTED TO AXIAL STRESS.....	1
1.2.1 Test of resistance to compressive stress.....	1
1.3 MATERIALS MAKING UP THE EMMEDUE SINGLE WALL.....	1
1.3.1 Self-extinguishing polystyrene foam (EPS).....	1
1.3.2 Structural plaster.....	1
1.3.3 Conclusions on the vertical bearing of the wall.....	2
1.4 STRUCTURAL ANALYSIS.....	4
1.5 DISTRIBUTION OF VERTICAL LOADS	6
1.6 BENDING BEHAVIOUR.....	8
1.6.1 Bending resistance tests	8
1.6.2 Criteria used to test bending.....	9
1.6.3 Conclusions	11
2. BUILDING WITH VERTICAL WALLS MADE BY EMMEDUE	
SINGLE PANEL IN SEISMIC ZONE	13
2.1 BEHAVIOUR OF EARTHQUAKE RESISTANT WALLS	13
2.3 MODEL OF SEISMIC ANALYSIS	16
2.4 METHODOLOGY OF ANALYSIS AND CONTROL.....	18
3. BUILDING WITH LOAD-BEARING WALLS MADE BY EMMEDUE	
DOUBLE PANEL	21
3.1 GENERAL OBSERVATION.....	21
3.2 FIRE RESISTANCE.....	22
